## COMPANY SUMMARY

GRACE Aerospace was founded by former Northrop Grumman Engineers, Program and Operations managers, bringing many years of industry experience and know how. Our customers have relied on GRACE for over two decades to build and deliver sophisticated systems to exacting standards on time and on budget. GRACE Aerospace is a full-service aerospace manufacturer with the following capabilities:

- Product development and engineering
- Electrical assemblies - cables, wiring harnesses, CCA's, interior control panels
- Structural fabrication
- CNC Machining & Sheet Metal fabrication
- Systems test & integration
- Rapid prototyping

GRACE Aerospace assigns dedicated teams to support and manage projects from inception to completion resulting in turnkey solutions. Through focused customer support and liaison engineering, customers are provided with a high-quality product and rapid turnaround.

## PAST PERFORMANCE

- Fabricated and finished thousands of structural components and assemblies in support of the US Navy's P-8 Poseidon aircraft mission systems upgrades as well as support for numerous other legacy aircraft.
- Manufactured and tested thousands of complex wiring systems for the government including power, signal, and RF assemblies.
- Integrated hundreds of boxes and panels, avionics cockpit controls, and electro-mechanical assemblies for flight and ground support.
- Performed complete systems integration for complex multi-bay rack systems including fabrication, finish, and assembly, wiring systems fab and installation, integration, and test. GRACE Aerospace continues to support various aircraft platforms including, but not limited to the following:

- |           |                         |
|-----------|-------------------------|
| ▪ P3/EP-3 | ▪ F-15                  |
| ▪ P8      | ▪ F-16                  |
| ▪ E2C/E2D | ▪ F/A-18                |
| ▪ F-5     | ▪ T-45 Trainer Programs |
